Phase 1: Student Profile & Course Portal (HTML Only) - Displaying Your Grades with HTML Tables

📺 VIDEO ANALYZED:

https://youtu.be/_lBiC9OqeUw

🎯 CONCEPT EVALUATION

ACCURACY > 80%?

No

ABILITY TO EXPLAIN

Beginner

🏆 ACCURACY FEEDBACK

✓ WHAT YOU DID WELL

- You spoke clearly and confidently while introducing your student portal web page.
- You successfully demonstrated how to run your HTML code using the Live Server extension in VS Code.
- You walked through your HTML code layout step-by-step, showing elements like navigation, headings, and link attributes.

⚠️ WHAT COULD YOU DO BETTER

- Video content does not match expected topic. Expected: Displaying Your Grades with HTML Tables. Shown: Contact Information page (contact.html).
- You did not explain the essential HTML table tags (table, tr, th, td) required for displaying grades.
- You did not mention or show the difference between th (table header) and td (table data) tags.
- You missed explaining how to define a header row and how to use the scope attribute (col or row) for web accessibility.

🎯 SUGGESTION FOR TECHNICAL ACCURACY IMPROVEMENT

- Record a video focusing specifically on grades.html to demonstrate HTML tables as requested in the assignment.
- Explain how table, tr, th, and td tags fit together to construct structured data rows and columns.

- Study and demonstrate the scope attribute inside th tags to explain how screen readers navigate tabular data for accessibility.

☆ ABILITY TO EXPLAIN FEEDBACK

✓ WHAT YOU DID WELL

- You started your video with a friendly greeting and a clear introduction.
- You walked through your contact page layout in a clear, step-by-step order.
- You showed your code in the editor and showed the final page in the browser.

⚠️ WHAT COULD YOU DO BETTER

- You explained the contact page instead of the requested Grades page with HTML tables.
- You did not mention or explain essential table tags like <table>, <tr>, <th>, or <td>.
- You did not explain why table header scope attributes are helpful for accessibility.
- You did not use any analogies or simple comparisons to explain web development concepts.

🎯 SUGGESTION FOR IMPROVING EXPLANATION

- Make sure to read the assignment topic carefully and explain the Grades page using HTML tables.
- Explain each HTML table tag one by one, showing how <tr> creates rows and <td> creates cells.
- Try using an analogy, like comparing an HTML table to a paper spreadsheet, to make the concept easier to understand.
