Phase 1: Student Profile & Course Portal (HTML Only) - Creating Your Personal Profile Page with HTML

📺 VIDEO ANALYZED:

https://youtu.be/BzhTYr64aEw

🎯 CONCEPT EVALUATION

ACCURACY > 80%?

No

ABILITY TO EXPLAIN

Intermediate

ACCURACY FEEDBACK

✓ WHAT YOU DID WELL

- You did a good job showing your code in VS Code and opening the live preview in the browser.
- You explained semantic tags well, such as header, nav, main, section, and footer.
- You clearly showed how ul and li tags create navigation links.
- You explained how the hr tag adds a horizontal line on the web page.

⚠️ WHAT COULD YOU DO BETTER

- You did not explain how to embed an image using the img tag along with src and alt attributes.
- You explained unordered lists ul, but you missed explaining ordered lists ol and when to use each.
- You explained the horizontal rule hr tag, but you did not mention or explain the line break br tag.
- You created a college portal home page instead of focusing on a personal profile page with hobbies.

🎯 SUGGESTION FOR TECHNICAL ACCURACY IMPROVEMENT

- Practice using the img tag and always include the src attribute for image path and alt attribute for accessibility.
- Study ordered lists ol so you can explain when to use numbered lists versus bulleted lists ul.
- Learn to use the br tag for breaking text onto a new line inside paragraph elements.

- Build a complete profile page containing an image, an About Me section, and a hobbies list to cover all project requirements.

☆ ABILITY TO EXPLAIN FEEDBACK

✓ WHAT YOU DID WELL

- You gave a clear introduction stating that you are explaining the home page of your student profile portal.
- You showed your HTML code in VS Code and demonstrated the actual web page output using Live Server.
- You correctly identified and used semantic HTML5 tags such as header, nav, main, and footer.

⚠️ WHAT COULD YOU DO BETTER

- You did not explain how to embed an image using the img tag with src and alt attributes.
- You missed explaining how ordered lists (ol) work compared to unordered lists (ul).
- You did not use any analogies or comparisons to help explain technical concepts simply.

🎯 SUGGESTION FOR IMPROVING EXPLANATION

- Try using an analogy, like comparing an HTML page layout to a book with a header title, table of contents (nav), body chapters (main), and footnotes (footer).
- Be sure to demonstrate how to add images using <img src='photo.jpg' alt='Student Photo'> to complete the personal profile requirements.
- Explain the difference between unordered lists (ul) for items with no order and ordered lists (ol) for numbered steps or rankings.
