Phase 1: Student Profile & Course Portal (HTML Only) - Listing Your Courses: The Course Page

📺 VIDEO ANALYZED:

https://youtu.be/1gR724SMMB4

🎯 CONCEPT EVALUATION

ACCURACY > 80%?

No

ABILITY TO EXPLAIN

Beginner

ACCURACY FEEDBACK

✓ WHAT YOU DID WELL

- You did a good job showing your HTML code in VS Code and opening the browser preview.
- You correctly explained heading tags like <h1>, <h2>, and <h3> to build heading hierarchy on the page.
- You clearly demonstrated how to use <nav>, <ul>, <li>, and <a> tags to create navigation links.

⚠️ WHAT COULD YOU DO BETTER

- You did not explain the difference between an absolute URL and a relative URL in href attributes.
- You focused on the home page layout instead of building and showing a dedicated 'My Courses' list page.
- You did not show how to structure course items with a title and a short description using HTML tags.
- You did not mention how to create placeholder links using <a> tags for future pages.

🎯 SUGGESTION FOR TECHNICAL ACCURACY IMPROVEMENT

- Study the difference between relative URLs (e.g., href='courses.html') and absolute URLs (e.g., href='https://domain.com/courses.html').
- Practice building a course listing page using <h2> or <h3> for course titles and <p> tags for short course descriptions.
- Learn how to create placeholder links using href='#' or empty link targets for pages under development.

- Ensure your video explanation directly addresses all required project prompt questions.

☆ ABILITY TO EXPLAIN FEEDBACK

✓ WHAT YOU DID WELL

- You started the video with a warm welcome and introduced yourself clearly.
- You showed your screen and explained your HTML tags line by line.
- You correctly identified semantic tags like header, nav, main, and footer.

⚠️ WHAT COULD YOU DO BETTER

- You explained the home page code instead of explaining how to build the course list page.
- You did not explain the difference between absolute URLs and relative URLs.
- You did not use any simple examples or analogies to explain how HTML links work.

🎯 SUGGESTION FOR IMPROVING EXPLANATION

- Try to follow the main topic by showing how to list courses with titles and descriptions.
- Use a fun analogy to explain relative vs absolute URLs, like comparing a home address to room numbers inside a house.
- Add a quick summary at the end of your video to recap what you taught.
