Phase 1: Student Profile & Course Portal (HTML Only) - Listing Your Courses: The Course Page

📺 VIDEO ANALYZED:

https://youtu.be/1gR724SMMB4

🎯 CONCEPT EVALUATION

ACCURACY > 80%?

No

ABILITY TO EXPLAIN

Beginner

🏆 ACCURACY FEEDBACK

✓ WHAT YOU DID WELL

- You explained your code structure in VS Code clearly and showed the live preview in the browser.
- You properly used heading tags like <h1> for College Portal and <h2> for Welcome.
- You showed how to create navigation links using nav, ul, li, and a tags.
- You mentioned important semantic HTML tags such as header, main, and footer.

⚠️ WHAT COULD YOU DO BETTER

- The video showed home.html instead of explaining the expected courses.html page.
- You did not explain how to structure a list of courses containing a title and a short description.
- You missed explaining the difference between absolute URLs and relative URLs in the href attribute.
- You did not demonstrate how to use placeholder links for future pages.

🎯 SUGGESTION FOR TECHNICAL ACCURACY IMPROVEMENT

- Create and walk through courses.html to demonstrate listing enrolled courses with titles and descriptions.
- Clearly define and contrast absolute URLs such as full website addresses and relative URLs such as local file paths.
- Demonstrate placeholder links by showing how href='#' works for pages under development.

- Explain heading tag hierarchy explicitly, showing how h1, h2, and h3 organize page content logically.

☆ ABILITY TO EXPLAIN FEEDBACK

✓ WHAT YOU DID WELL

- You introduced your video clearly and stated that you were explaining the home page of your college portal project.
- You walked through your HTML code step-by-step, showing elements like header, nav, main, and footer.
- You correctly identified and mentioned semantic HTML5 elements like header, navigation, main, section, and footer.

⚠️ WHAT COULD YOU DO BETTER

- Your video explained home.html instead of the expected topic about creating a My Courses page.
- You did not cover how to structure a list of courses with titles and short descriptions.
- You did not explain the difference between absolute URLs and relative URLs in href attributes.
- You did not include any real-world analogies or comparisons to make the concept easier to understand.

🎯 SUGGESTION FOR IMPROVING EXPLANATION

- Make sure to record your explanation on the specific topic requested, such as explaining courses.html.
- Explain technical concepts directly, like comparing relative links (href='courses.html') to absolute links (href='https://site.com').
- Try using a clear analogy, such as comparing HTML layout tags to the sections of a printed newspaper.

- Include a short concluding summary at the end of your video to recap what you taught.
